

SOFTWARE DEVELOPER (M/F/D)

trivention GmbH is a young company in the network of Neuropsychiatric Centre Hamburg. We develop and implement products in the fields of eHealth, prevention and occupational health management. Our modern care solutions contribute to shaping the future of healthcare. We focus on quality, innovative strength and a stable research base in order to provide our customers with the best possible mental health. As part of the small Software Engineering Team, the Software Engineer will be responsible for applying engineering principles, procedures and techniques to perform systems engineering assignments related to the development of large, complex software systems. The role will develop and maintain central systems software for trivention GmbH in focus on social workers and HR.

JOB DUTIES AND RESPONSIBILITIES

- » Analysis of functional requirements
- » Creation of designs and detailed technical specifications for the software to be developed
- » Development and implementation of software, incl. software configuration control, unit tests
- » Support or realization of the deployment process
- » Production and maintenance of internal technical documentation as required, such as software designs, test specifications, technical notes
- » Keeping abreast of improvements and developments within software engineering

JOB REQUIREMENTS

- » Degree in computer sciences, information technology, maths, engineering or a comparable qualification
- » Knowledge of software development, methodologies and current software architecture trends and technologies
- » Advanced experience in Unity, C++/C#
